

ADDENDUM NO. 1
2026 Subaru Outback RFP

Date: 3-25-06

This Addendum No. 1 is issued to clarify and amend the original Request for Proposal (RFP).

Purpose of Addendum

The RFP was intended to solicit proposals exclusively for a **new 2026 Subaru Outback**. Certain cargo space specifications included in the original document were inadvertently carried over from requirements applicable to larger cargo vehicles and are not relevant to the Subaru Outback.

Revised Specifications

The following requirements listed under specifications, minimum requirements in the original RFP shall be **removed and disregarded**:

- Heavy-duty cargo flooring with a non-slip finish
- Interior cargo height of at least 72 inches
- Interior cargo length of at least 120 inches

These specifications do not apply to the Subaru Outback and shall not be considered in proposal evaluations.

Clarification

Proposals must be based on the **standard cargo dimensions and available features** of the 2026 Subaru Outback. Any references to commercial cargo capacity or upfit style requirements should be ignored.

Other Terms

All other terms, conditions, and requirements of the original RFP remain unchanged.
