

Stained Glass Suncatcher

Supplies:

- 2 sheets of contact paper
- One piece of black paper
- Color transparency pieces

How to:

1. Fold black paper in half and cut a shape from center fold to create a frame. Open up flat.

2. Peel the backing off the contact paper and lay it down sticky side up. Lay black paper on top.

3. Add one piece of color paper at a time in a design.

4. Once the frame is filled with color, peel second sheet of contact paper. Place this sticky side down on top of your suncatcher to seal in the color pieces. Trim off any excess contact paper on edges.

5. Take home and hang in a window to enjoy!
